

FCS for the Lymphatic-Venous Systems

FCS LV explores the newly discovered entity of lymphatic / venous dysfunction. This condition, identified by the presence of lymphatic and venous tender points, is essentially a vasospasm of the large lymphatic/ venous vessels of the body. Symptoms include myalgia, tendonitis, bursitis of all kinds, headaches, sinusitis and most fluid related conditions such as sinusitis and lymphedema are related to venous & lymphatic dysfunction. Treatment of this type of vascular dysfunction using FCS restores the normal "pump mechanism" of the lymphatic system and dramatically improves venous drainage in the affected areas including the spinal cord and cranial base. Patients typically report instant pain reduction and notice a marked reduction in edema / fluid symptoms immediately after applying these techniques.

Prerequisite: SCS I, II or FCS FI

Outline:

- *Physiological rationale for vascular dysfunction*
- *Anatomy and Physiology of the Lymphatic and venous Systems*
- *Research regarding the contractile properties of Lymphatic System and fascia*
- *Clinical signs and symptoms of venous and lymphatic dysfunction*
- *FCS techniques to correct venous/lymphatic dysfunction of the trunk, extremities, organs and regional bursae. Over 80 newly developed techniques will be presented*

Goals/Objectives:

- *Improve knowledge of Anatomy, Physiology and function of the venous & Lymphatic System*
- *Learn to recognize lymphatic and venous dysfunction in the body*
- *Gain proficiency in the treatment of venous & lymphatic dysfunction utilizing newly developed Strain and Counterstrain techniques*

Course Schedule:

Day One:	Day Two:	Day Three:
8:00 - 8:30 Registration	8:00 - 10:00 Cervicothoracic Venous Techniques	8:30 - 10:30 Lymphatic Dysfunction of the Hip and Thigh
8:30 - 10:30 Physiology /Anatomy	10:00 - 10:15 Break	10:30 - 12:15 Lymphatic Dysfunction of the Knee
10:30 - 10:45 Break	10:15 - 12:00 Azygous and Thoracolumbar Techniques	12:15 - 12:30 Break
10:45 - 12:00 Cranial Scan, Surface Anatomy	12:00 - 1:00 Lunch	12:30 - 2:45 Lymphatic Dysfunctions of the Calf and Foot
12:00 - 1:00 Lunch	1:00 - 3:00 Lymphatics of the Upper Extremity	2:45 - 3:00 Wind Down Lecture
1:00 - 3:00 Head / Sinus / Neck Techniques	3:00 - 3:15 Break	
3:00 - 3:15 Break	3:15 - 5:00 Visceral Lymphatic Row	
3:15 - 5:00 Epidural / Spinal Drainage Systems
