

SCS III – Cranial & Advanced Techniques

SCS III focuses on the Strain and Counterstrain approach to evaluating and treating cranial dysfunction. New and powerful cranial techniques have been added to the material to demonstrate the full body effect of each technique. Cranial anatomy and layer palpation will be reviewed. Emphasis is placed on principles of proper treatment sequencing and full body scanning. In addition, demonstration of 44 new techniques and variation techniques for troublesome patients will be presented. Upon completion of this course participants will further understand the broad range of use for the Strain and Counterstrain technique.

Prerequisite: SCS I for the Spine, SCS II for the Extremities, SCS Upper Quarter for OT's or SCS for Pelvic Pain

Outline:

- Cranial evaluation and treatment lab
- 44 new techniques
- Principles of treatment sequencing
- Practice full body scan

Course Schedule:

| Day One: | Day Two: | Day Three: |
|-----------------------------------|---|--|
| 8:00 - 8:30 Registration | 8:30 - 10:15 Cranial Treatment | 8:30 - 10:00 Continue Lower Extremity |
| 8:30 - 10:00 Introductory Lecture | 10:15 - 10:30 Break | 10:00 - 10:15 Break |
| 10:00 - 10:15 Break | 10:30 - 12:00 Full Body Scan | 10:15 - 1:30 New Upper Extremity Technique |
| 10:15 - 12:00 Cranial Evaluation | 12:00 - 1:00 Lunch | 1:30 - 3:00 Discuss Common Patterns of Dysfunction |
| 12:00 - 1:00 Lunch | 1:00 - 3:00 New Spinal Techniques | |
| 1:00 - 3:00 Cranial Treatment | 3:00 - 3:15 Break | |
| 3:00 - 3:15 Break | 3:15 - 5:00 New Lower Extremity Technique | |
| 3:15 - 5:00 Cranial Treatment | | |
