

SCS for the Lymphatic System

Prerequisite: SCS I or SCS II

SCS LS explores the newly discovered entity of lymphatic dysfunction. This condition, identified by the presence of lymphatic tender points, is essentially a vasospasm of the large lymphatic vessels of the body. Symptoms include myalgia, tendonitis, bursitis of all kinds, headaches, sinusitis and most fluid related conditions such as sinusitis and lymphdema are related to lymphatic dysfunction. Treatment of lymphatic dysfunction using SCS restores the normal "pump mechanism" of the lymphatic system. Patients typically report instant pain reduction and notice a marked reduction in edema / fluid symptoms.

Outline:

- *Origin of Lymphatic SCS*
- *Anatomy and Physiology of the Lymphatic System*
- *Research regarding the contractile properties of Lymphatic System and fascia*
- *Introduction to the concept of Lymphatic Dysfunction*
- *SCS techniques for Lymphatic Dysfunction of the trunk, extremities, organs and regional bursae. Over 45 newly developed techniques will be presented*

Goals/Objectives:

- *Improve knowledge of Anatomy, Physiology and function of the Lymphatic System*
- *Learn to recognize lymphatic dysfunction in the body*
- *Gain proficiency in the treatment of lymphatic dysfunction utilizing newly developed Strain and Counterstrain techniques*

Course Schedule: TBA Soon

Day One:	Day Two:	Day Three:
